COMPANY PROFILE

GLOBAL SUPPLIERS OF NEW, GOOD USED & RECONDITIONED
SPARES & COMPONENTS
FOR EARTHMOVING, MINING AND CONSTRUCTION EQUIPMENT.

Who we are

We are a South African based procurement hub specializing in the supply of heavy mobile equipment spares and components for heavy earthmoving, mining & construction operations. Heavy machinery parts and components breakdown and ware out over time. It's essential to have back-up support you can trust.

We supply low hour, late-model branded spares and components, to help minimise down-time, and reduce your owning and operating costs, over the life of your mobile fleet. You'll also enjoy peace of mind with comprehensive aftersales support when we supply major components, including on-site commissioning, testing, oil sampling, in-field monitoring and more. And, of course, we offer a wide range of extensive warranties.

We supply spares and components for leading brands including CAT, Komatsu, Liebherr, Hitachi, Bell and Volvo equipment. Our product range includes Engines, Transmission, Torque Converters, Complete Front Corners, Diffs, Final Drives, Cylinders, Buckets and Implements.

Our multi-source service is tailored to the specific needs of each project needs. We offer a turnkey saving based on the location of a mine, commodity being extracted, production volumes / capacity and overall equipment needed over the project life cycle.

Our logistical partners allow us to transport our products globally by sea, road & air freight. We have relationships with major brands specialist manufacturers and suppliers in America, Europe, Asia & South Africa.
